Furniture (soft furniture, hard furniture) as per the details given in the table above. The product count is limited to 500K/site

4. Extraction of the flyers carrying all the details to be done for the sites which will be provided in the separate list, and the list of sites can vary from time to time. The necessary request giving site details will be provided by TCS as per the requirement from ALDI.
5. Data validations as shared should be performed by SUB and report to be shared after every crawl
6. Make sure all the attributes mutually agreed upon and available on the website are captured   and shared accurately. Most websites when opened in India, display the products which can be shipped to India only. Before crawling, the shipping location has to be changed to the country of that website, so as to capture all the products.
7. Data extracted from the websites to be presented in the format provided by TCS (the required fields not limiting to following are given below and the format is attached herewith which is subject to change). The format covers the required fields (first tab) (second tab) to be captured.

   # product_name, # brand, weight, # price_valid_from, # price_per_kg/I, # price, currency, # breadcrumbs, # pdp_url, , # variants, # Aritcle No., # Capacity, # Article Info., # Certification, # Manufacturer, # # Country of origin, # Eco control body, # Allergen notice, # Free of, Storage notice, # Alcohol content: # Taste, # Vintage, # Wine rating, # Wine color, # Calorific value, # Protein, # Carbohydrates, # Of which sugars, # fat, # hereof: saturated fatty acids, # salt

8. TCS will communicate the day and time at which Data Hut to provide the extract and price as applicable to Monthly extract and Weekly price and Weekly Extract and Daily price requirement.
9. Crawled data history to be maintained by the SUB at-least six months from the extract date.
10. TCS will provide continuous feedback to improve the quality of the extract and accordingly requirements will evolve in terms of format to be used, data quality, related quality, and overall improvement of the extract
11. Time to Time, as per the requirements of ALDI to be fulfilled, TCS will make necessary amendments in the above list of sites and communicate to Datahut well in advance.
12. Datahut to fulfill the request within 24 hrs. of the request from TCS in email and or through Help Desk that is set up by Datahut.
13. In case, Datahut is not in a position to meet the agreed TAT as mentioned above, Datahut to provide a valid justification for which TCS to agree on and have a mutual consensus of the revised timeline of the fulfillment of the request.
14. All such communication for the point 10 mentioned above to be exchanged and recorded in the official emails of the TCS and SUB.

2. Data Validation requirements

Following data validations checks shall be performed by the SUB prior to sharing the crawled data with TCS.

1. Ensure product attributes and their respective List of Values (LOV's) to be relevant to category and the website
2. Site map of all the websites to be captured accurately
3. A weekly Data validation report comprising of above checks to be produced to TCS
